## AMENDMENTS TO THE CLAIMS

## In the Claims:

The following listing of claims replaces all prior versions and listings of claims in the application.

## Listing of Claims:

- (Currently Amended) Surgical thread (1)-for cosmetic operations made of a metallic, polymeric, or biological material, containing successively arranged along its length inclined notched protrusions, eharacterized in that wherein the notched protrusions (2)-are made in the form of conical barbs (3)-with pointed flexible and elastic ends-(4), the barbs (3; 5)-positioned on one or several sides along the section of the thread with a successively alternating inclination thereof.
- (Currently amended) A surgical thread (1)-for cosmetic operations, according to claim 1, eharacterized in that wherein the elevation (6)-of the ends (4)-of the notched protrusions (2)-above the thread amounts to not less than the diameter thereof, the interval (7) between the protrusions being less than two diameters of the thread.
- (Currently amended) A surgical thread (1) for cosmetic operations according to claim 1, eharacterized in that wherein the notched protrusions (2) of the thread are provided on two opposite sides, the direction of their inclination being opposite as well.
- (Currently amended) A surgical thread (±)-for cosmetic operations according to claim 1, characterized in that wherein the notched protrusions are provided on two sides with an alternating direction of their inclination.
  - (Canceled).
- 6. (Currently amended) A surgical thread (±)-for cosmetic operations-according to elaim 1 made of a metallic, polymeric, or biological material, comprising inclined notched protrusions successively arranged along the length of the thread, characterized in that wherein the notched protrusions are provided in a form of needles (9)-with sockets (±0)-for fixation thereof on the thread with alternating directions of the inclination of the needles.

Serial No.: 10/517,169 Att'y Dkt: 2185-192

7. (Previously presented) The surgical thread of claim 1, wherein the barbs are positioned in a staggered order along the thread.
